

TECHNICAL DATA | PLUMMA'S BLUE GLUE TYPE N SOLVENT CEMENT

Description and Application

PLUMMA'S BLUE GLUE Type N is a specially formulated resin based adhesive for bonding PVC-U pipe, fittings and sheet. It is fast setting and suited for PVC-U Pipes with a diameter of 100mm or less. PLUMMA'S BLUE GLUE Type N is suitable for Non-Pressure applications in residential, commercial and industrial work such as Sewerage, Drainage, Storm Water, and Electrical & Cable Conduit. Bonds are waterproof if the jointing instructions in AS/NZS 2032 are followed.

Features and Benefits

- Manufactured to the highest Australian Standards and Quality Assurance, PLUMMA'S BLUE GLUE Type N comes with a 10 year manufacturer's warranty.
- Conforms to the stringent performance requirements of AS/NZS 3879
- AS/NZS 4020 approved, suitable for use in contact with drinking water.
- Watermark and ISO 9001:2008 accredited
- All Packaging is Dangerous Goods approved for storage and transport
- Tightly engineered cap to minimise the risk of leaks.
- All containers are supplied with a natural bristle brush applicator cap to ensure easy application.
- Proven product performance over several decades in millions of applications around Australia and overseas.
- AS/NZS 3879 Shear Stress Test Requirements for Type N

DRYING TIME

20 Minutes
1 Day
60 Days

JOINT STRENGTH TO EXCEED

0.1 MPa | 100 kPa or 14.5 psi
1 MPa | 1000 kPa or 145 psi
4 MPa | 4000 kPa or 580 psi

PHYSICAL PROPERTIES

Appearance
Specific Gravity @ 20°C
Viscosity @ 20°C, cPs
Contents
Shelf Life

DESCRIPTION

Blue Viscous Liquid
0.88 - 0.90
500 - 700
Contains more than 700g/L Hydrocarbon Liquids
2 Years if unopened and stored in a cool, dry well ventilated place, out of direct sunlight

VOC LEVELS (Volatile Organic Compound)

The Green Building Council of Australia has advised that "Pipe cements are not relevant to the VOC credit as they have little influence on indoor air quality. Plumbing pipes are usually installed some time prior to building occupation and any residual of solvent will be negligible by the time the building is sealed and occupied. In addition plumbing pipes are not a major component of an individual fit-out or building, plumbing cements are minor in quantity in the indoor fit-out when compared to adhesives used in countless other indoor applications." (GBCA Technical Clarification Statement PVC Pipe Cements IEQ-13, Clarification No. 43, October 2009). Refer to the GBCA website for more information www.gbca.org.au

TECHNICAL DATA | PLUMMA'S BLUE GLUE TYPE N SOLVENT CEMENT

DIRECTIONS FOR USE

PVC Pipe Cement Jointing is a trade skill and should only be executed by appropriately qualified trades' people. Refer to AS/NZS 2032 for complete PVC Pipe Cement jointing instructions.

PREPARING THE JOINT

1. Ensure pipe is cut square and remove burrs.
2. To ensure correct assembly of joint, mark pipe at a distance equal to full socket depth.
3. Test joint for dry fit.
4. Clean pipe and inside of socket using a clean cloth freshly moistened with PLUMMA'S RED PRIME Priming Fluid. This is essential to ensure a satisfactory bond.

MAKING THE JOINT

1. Shake or stir thoroughly PLUMMA'S BLUE GLUE Type N before using.
2. Apply PLUMMA'S BLUE GLUE Type N in full even coats to both surfaces firstly to the inside of socket, then to external surface of pipe end.
3. Immediately assemble, pushing the pipe home to the full depth of the socket.
4. Hold bonded joint in position for at least 30 seconds.
5. Do not disturb for 5 minutes.
6. Allow 24 hours curing before testing.

The open time of PLUMMA'S BLUE GLUE Type N, which is the time from the beginning of adhesive application until the joining of the parts, is dependent on the temperature and on the thickness of the adhesive layer.

With an adhesive layer of 1 mm and at the temperature given below, the parts should be joined within the following times:

20° C	4 min
25° C	3 min
30° C	2 min
40° C	1 min
>40° C	>1 min

For the first 5 minutes after cementing, avoid moving the pipes. At temperatures of less than 10°C, this should be extended to 15 minutes. If in the ground, cemented jointed pipes may be covered after approximately 10-12 hours. Before using the pipes in normal operation, thoroughly flush them through with water to remove any solvent vapour.

Where pipes are not required for immediate service, it is advisable to flush through thoroughly and possibly allow to stand filled with water.

TECHNICAL DATA | PLUMMA'S BLUE GLUE TYPE N SOLVENT CEMENT

CAUTIONS

1. Keep the lid tightly on PLUMMA'S RED PRIME and PLUMMA'S BLUE GLUE Type N when not in use. Evaporation of the solvents will affect the quality and performance of the PLUMMA'S BLUE GLUE Type N.
2. PLUMMA'S BLUE GLUE Type N should have a "syrup-like" consistency.
3. Do not use it if it is lumpy or "jelly-like" consistency.
4. No additive of any kind (including Priming Fluid) should be mixed with PLUMMA'S BLUE GLUE Type N.
5. PVC Pipe Cements take no longer to set in colder temperatures. Do not try to artificially speed up the drying process of PLUMMA'S BLUE GLUE Type N by using hair-dryers or the like. This could affect the integrity of the joint.
6. Avoid spilling the PLUMMA'S BLUE GLUE Type N and PLUMMA'S BLUE GLUE Type N as the dyes leave a permanent stain. In the event of spillage, soak up as quickly as possible with a clean dry cloth.

LIMITATIONS

- PLUMMA'S BLUE GLUE Type N is to be used for Non-Pressure Applications only.
- For Pressure Applications use PLUMMA'S BLUE GLUE Type N.
- Temperatures above 30°C and/or windy conditions can result in premature drying of PLUMMA'S BLUE GLUE Type N and prevent a satisfactory bond. In such circumstances either apply a second coat or use a Slow Setting Pipe Cement.
- For PVC pipes with a diameter exceeding 100mm use a Slow Setting Pipe Cement or Large Diameter Pipe Cement.
- Not suitable for bonding polyethylene or plasticised PVC articles.

SAFETY DIRECTIONS

- Irritant.
- Avoid breathing vapour.
- Avoid contact with skin and eyes.
- Highly Flammable and Keep away from Flames.
- NOT TO BE TAKEN.
- REFER TO MATERIAL SAFETY DATA SHEET FOR ADDITIONAL INFORMATION.

FIRST AID

If poisoning occurs contact a doctor or Poisons Information Centre. Phone: Australia 131 126 NZ: 0800 764 766 or a doctor immediately. If swallowed do not induce vomiting. Give a glass of water.

STORAGE

Store in a cool, dry, well ventilated place and out of direct sunlight. Shelf life is 2 years from the date of manufacture if stored in accordance with the manufacturer's recommendations.
